EDUCATION

UXLAND

May 2023 - Present

Bachelor of Architecture

University of Science and Culture - 2020

ABOUT ME

I am a UI/UX designer with a passion for creating elegant and user-friendly solutions that combine aesthetics and functionality. I have a bachelor's degree in architecture, which has given me a solid foundation in design principles, spatial awareness, and problem-solving skills. I have also worked as a software tester for 3 years, where I gained valuable experience in testing web and mobile applications, identifying bugs, and providing feedback to developers. I have learned UI/UX design skills by using a mix of self-taught methods and online courses. I am eager to learn more and to work on real-world projects that can make a difference.

EXPERIENCE

UI/UX DESIGNER

*thisApp . Oct 2022 - Present

My first real project in the field of UX/UI was a complete redesign of a website and app for budget management and cryptocurrency expansion.

SOFTWARE TESTER

Pendulums . Jun 2018 - Oct 2021

The product is a web and mobile application for time management. I was responsible for testing the functionality, usability, and performance of the product. I used various tools and techniques to identify and report bugs, errors, and defects. I also collaborated with the developers and the designers to ensure the quality and reliability of the product.
